OSC Moore continues to coordinate with LDEQ on Flood Response activities including debris collections and emergency responses.

LDEQ is trying to finalize its assessments on facilities and WWTPs. Their primary focus is ongoing assessments of landfills and debris staging areas to insure compliance with permits and emergency orders.

OSC Brescia and Baxter will be meeting with LDEQ to discuss transition of Lard Oil Response over to the LDEQ Remediation Division. LDHH will assist in evaluating any air sampling data collected from within residential housing.
